Professional Summary

Frontend Developer with hands-on experience building responsive web applications using HTML5, CSS3, JavaScript (ES6), React.js, and the MERN stack. Passionate about creating clean, interactive UI and real-world projects including AI-integrated web apps. Seeking a software development role to apply and expand technical expertise.

Technical Skills

Languages & Markup: HTML5, CSS3, JavaScript (ES6)
Frameworks & Libraries: React.js, Express.js, Responsive Web Design
Databases: MongoDB
Core Concepts: DOM Manipulation, Interactive UI Components, REST APIs
Tools & Platforms: Git, GitHub

Projects

Hospital Management Website (MERN) Live Demo ↗

- Developed a full-featured hospital management system where users can manually book appointments by department.
- Implemented business logic: a patient cannot rebook the same department until their current appointment is cancelled.
- Integrated AI-assisted doctor recommendation to help patients choose the right specialist.

AI-Powered Hospital Chatbot (MERN Stack) Live Demo ↗

- Built an AI chatbot that helps patients identify the right doctor based on their symptoms using OpenAI integration.
- Patients can book appointments through conversational AI without navigating complex forms.
- Developed using MongoDB, Express.js, React.js, and Node.js (MERN stack).

Work Experience

Telecalling Executive 2018 – 2019
